

# BLUETTI Balco Series

Simple. Smart. Savings.

Plug-and-Play Solar for Smarter Homes

# Plug & Play Power for Home & Apartment

## Save Up to €1,632/Year\*

Turn sunlight into real savings with a high-efficiency 2,400W system.

\*Based on typical German solar yield and €0.30–0.38/kWh rates.

## 2,300W Usable Power

Break the 800W limit. Combine 1,200W battery and 1,100W grid power to run more devices safely and legally.

## Real-Time Smart Metering

Pair with smart meter to track energy use as it happens and automatically prioritize where power is needed most.

## Effortless Energy Management

Wireless multi-unit networking, smart home integration, and AI-driven TOU optimization for lower energy costs.

## The Ultimate Balcony & Home Energy Crossover

### **Balcony Solar + Whole Home Backup**

5kWh capacity, 3.68kW AC output supports daily use and keeps your home powered when needed — a true 2-in-1 solution.

### **High-Voltage Solar, Simplified**

4.36kW input with a 70–470V range lets you build bigger, more efficient solar setups with ease.

### **Scale Up as You Go**

Sync up to 3 units for up to 11kW output and 15kWh capacity. Flexible whole-home power with easy installation.

### **Effortless Energy Management**

Wireless multi-unit networking, smart home integration, and AI-driven TOU optimization for lower energy costs.

## Turn Portable Power Into a Grid-Ready Energy System

### Give Your Portable Power a New Purpose

Turn your power station into part of a grid-tied balcony solar system.

### Plug Into Your Home Grid

Connect to a standard outlet and start feeding up to 800W of grid-compliant power, or tap into backup energy anytime.

### Works with BLUETTI and Beyond

Compatible with BLUETTI and select third-party systems, so you can mix, match, and scale your setup your way.

### Effortless Energy Management

Wireless multi-unit networking, smart home integration, and AI-driven TOU optimization for lower energy costs.
